# Lukasz Rodzen

## AI PRODUCT BUILDER

Przemyśl, Poland | Remote | +48 530 060 966
lukasz.rodzen1987@icloud.com | Portfolio and case studies

---

AI product builder with two years of full-time, hands-on experience with coding agents. Took a complex software product from idea to production, integrating multiple external APIs, live data tracking, analytics, automated execution and dashboards across two servers and three codebases. The platform has operated since March 2026. Built a custom delivery workflow covering research, planning, implementation, audits, testing and release.

### EXPERIENCE

**AI Product Builder | Independent Product Development**

Full-time | 2025 - present

- Built and operate a trading and analytics platform connecting data collection and research to automated execution, live monitoring and a web interface. Production trading uses my own capital.
- Secured more than $60,000 to fund development in exchange for access to the platform's data.
- Designed and continually improve a custom AI delivery workflow covering research, planning, implementation, audits, testing, deployment, documentation and ongoing maintenance.
- Coordinate specialised agents across model families, track their performance and adapt the workflow as models and tools improve, balancing review quality and usage costs.
- Own product requirements, priorities and release decisions. Validate the finished product through hands-on testing and investigation, catching issues missed by AI reviews and improving future checks.

### EARLIER EXPERIENCE

**Acting Marketing Lead | bloXmove | 2021 - 2024**

Led positioning and launch communication for a mobility-infrastructure product; translated complex concepts for users, partners and press.

**Head of Marketing | Squares Capital | 2021 - 2023**

Owned positioning, campaigns, partnerships and community communication for an online financial business.

### TOOLS & SYSTEMS

**AI tools:** Claude Code, Codex, Gemini, Grok.

**Built and operated with agents:** Python/FastAPI, Rust, PostgreSQL/TimescaleDB, Redis, APIs, WebSockets, Linux, Git.

### EDUCATION & LANGUAGES

BA, Physical Education | Akademia Kultury Fizycznej, Kraków | 2009 - 2013
Polish: native | English: fluent
